BURAKBOND

® by burak aluminium

BURAKBOND® composite panels are painted with KYNAR® 500 (more than 70%) based PVDF (Polyvinylidene Fluoride) coating system. PVDF coating system is well-known in the painting industry with its high-quality protection against various weather conditions, sun and atmospheric pollution. All these superior protective features brings maximum firmness, optimum chemical-thermal balance and a very good elasticity. Beside feature of repelling moisture and dirt, PVDF coating system also shows a high resistance against external impacts.

BURAKBOND

® by burak aluminium

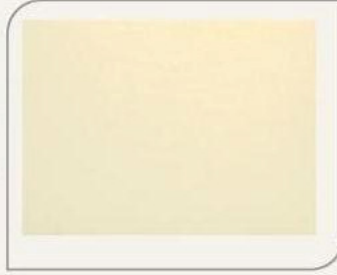

BURAKBOND® composite boards have maximum strength, optimum chemical- thermal balance and high flexibility. Their surfaces with dust and humidity repellent feature show high level resistance to external impacts. BURAKBOND® aluminum composite panels make difference in your life places with unlimited color options. BURAKBOND® provides you with economy and quality in your designs, indoor environment and advertising works. BURAKBOND® offers you ease of application with 10-year-warranty when you search for an economic solution for your designs.
